

FOCUSED FACTORY IN ACTION

■ *The Xtek Gear Team*

TEAMWORK... The cornerstone of any successful organization, is a way of life at Xtek. Add versatility, a commitment to quality, state-of-the-art equipment and a partnering approach to customer service, and you really have a winning combination. The Xtek combination. A total team approach, exemplified by the Xtek gear product line.

Xtek employs a *focused factory* strategy to promote teamwork within its gear production group. The Company has created a gear manufacturing unit that puts all necessary equipment and the team members that utilize the equipment together in one area to provide a smooth, efficient production flow.

The gear production team is made up of highly skilled, cross-trained craftsmen who know the art and science of gear manufacturing. This group "owns" a part from the moment

raw material is received until the finished part ships to the customer. Team members take pride in their product ownership and in the knowledge they have the finest equipment to provide customers with the highest quality gearing available — anywhere.

State-of-the-art equipment in the manufacturing cell features CNC turning centers and lathes to supply quality blanks; CNC gear hobbors capable of producing high quality gearing; lead and involute checkers to ensure finished piece quality; and a full complement of support equipment. To this precision machining capability, add some of the most

advanced heat treating facilities and almost a hundred years of application experience and you have a manufacturing group capable of supplying the right gear for every application, every time.

So, when you need quality gearing, come to the winning team. Come to...
